

# Lab 2: Resume with HTML

GEOG 478 - WebGIS

Jikun Liu

[jikun@tamu.edu](mailto:jikun@tamu.edu)

# Logistics That You Care - Again!

1. Attendance is NOT required
  - a. Participation is not part of your lab grade, nor do you have to stay for the entire session
  - b. Attending lab sessions is only for your own good - understanding of the assignments, TA's help, etc.
2. I am supposed to know EVERYTHING about completing the lab assignment
  - a. That means, if you have any questions on lab material/grading, always contact me
    - i. This includes any amount of troubleshooting - don't hesitate to ask
  - b. That also means, I may have limited or no knowledge on other subjects - your project, etc.
3. Contact me only through email, NOT Canvas - [jikun@tamu.edu](mailto:jikun@tamu.edu)
  - a. Different from Prof. Zhang - she specifically asked you to contact her through Canvas
  - b. I will always respond lab email within 24 hrs (except during breaks)
4. Due date for all lab assignments is 2 weeks since their respective lab sessions
  - a. For example, if you are a 502 student, then your lab 1 session time is Tuesday, Jan 23.
    - i. Then, your due date for lab 1 assignment is Tuesday, Feb 6, 11:59 PM.
  - b. If you need extensions, you need to let me know before the deadline in most cases. Extensions will be granted based on your circumstance.
  - c. Late work policy - late assignments will receive a 5% score deduction for each day after the original due date

## About code copy-pasting from online...

Unchecked for the course; as long as you can find the correct pieces and put them altogether, your final results will be evaluated.

About AI-use:

Whenever there is certain write-up, it has to be original.

AI use for collecting preliminary information on topic is encouraged.

AI generated code is highly discouraged.

## Upcoming Dues

Lab 1: In 1 weeks: Feb 6th, Thursday, 11:59 PM

Lab 2: In 2 weeks: Feb 13th, Thursday, 11:59 PM

# Task 1 - CodeAcademy

Refer relevant links in the lab manual.

1. Sign up for CodeAcademy
2. Finish Lesson 1 - Element and Structure - 2 Lessons (ONLY Lessons, NO quizzes or projects)
3. Finish Lesson 2 - Tables - 1 Lesson (ONLY Lessons, NO quizzes or projects)

There should be no need to start free trial for the website for the purpose of this lab. Let me know if you have any questions.

## Task 2 - Resume

CHECK THE GRADING RUBRIC - on lab manual, assignment page, etc.

Considerably comprehensive list of most common tags in lab manual, also presented in lectures
